grade security

How it works

Complete calling: Cisco Webex for Broadworks is integrated with our cloud calling and PSTN services, providing flexibility, reliability and security. Your customers can publish one business phone number, and make and receive calls from a device of their choice.

Messaging to keep work moving: Bring everyone together easily and quickly in Cisco Webex for Broadworks. Enable everyone to see and share all the information they need. Send messages, share files, and create or edit whiteboards securely, both inside and outside the company. Everything is always in one place.

Meetings built for teams: High-quality video meetings with screen sharing and annotation from any device, plus additional features, including breakout rooms, gestures and reactions to give everyone a voice. Users can also improve experience with virtual backgrounds, noise removal and speech enhancements.

Integrate with other tools for an uninterrupted workflow: Cisco Webex for Broadworks integrates with solutions from vendors like Microsoft, Google and Apple, so users can bring content into Cisco Webex spaces. They can also access business information and alerts from other systems and avoid switching in and out of different apps.

Enterprise-grade security: We keep your customers' sensitive information safe; messages, files and whiteboard drawings are all protected with end-to-end encryption.

The power of Cisco Webex for Broadworks

With Cisco Webex for Broadworks, businesses can create secure virtual workspaces for everything, from completing short-term projects to addressing long-term business opportunities. Simplify day-to-day interactions with messaging and file sharing that can be enhanced with third-party app integrations for seamless workflows and give everyone a voice, with both synchronous and asynchronous communications, helping businesses to increase employee engagement.

The app also enables users to start calls instantly, and host high-quality video meetings with screen sharing at the touch of a button, and express ideas on digital whiteboards that colleagues can access and edit at any time. When teamwork flows into meeting rooms, your customers can bring the Cisco Webex experience with them. Just connect the app to one of our compatible devices to enable wireless meetings, screensharing, whiteboard drawings and more.
