Enterprise Edition Series  
S22 | S22 Ultra

## Why premium?

With Millennials a dominant force in the workplace and Gen Z entering the workplace, a new strategy is required to attract and retain the best talent amongst these groups.

HR directors say that having the latest collaborative technology is the most critical component in hiring and retaining the the most talented personnel. According to Harvard Business Review<sup>1</sup>, 88% of employees agree that this is what they seek for when looking for a new job.

### **Unleash your employees' full potential with the ultimate tool for business.**

Empowered. Motivated. Respected. This is how your employees will feel with the Galaxy S22 Enterprise Edition Series in their hands. All of which are linked to stronger job performance, job satisfaction and job loyalty.

When employees are given high-powered tools and resources, they can better manage or lead their own projects, work toward their goals and drive their own careers. The benefits of which are endless.

### **Give creativity the chance to flourish.**

Creativity is what fuels big ideas, challenges employees' ways of thinking, and opens the door to new business opportunities.

But they need a phone that comes fully armed to tackle the challenges of tomorrow. The Galaxy S22 Enterprise Edition Series is your employees' 'anywhere office'. They can tap into

their creativity anytime, anywhere with advanced and exciting tools that foster innovation and inspiration. All on a device that they can rely on to deliver the power they need day after day.

By investing in your workforce with top technology, you can remove siloes and unnecessary processes, ultimately increasing productivity. Meanwhile, outdated technology hinders productivity: Salesforce workers claim they couldn't have done their jobs during the pandemic with technology from five years ago<sup>2</sup>.

### **Provide the user experience that takes their work to the next level.**

Premium smartphones make work more intuitive, much more enjoyable and a fair bit faster too. With the best user experience around, there's nothing to get in your employees' way. They'll also have high processing power and cutting-edge features to further boost their capabilities, allowing them to get everything done from their phone.
