The definitive phone for business

We all know work has changed. Your teams do business in their own way, from anywhere in the world. And they need to share information on the go, in real time. So, they also need tech that's ready for this hybrid style of working. That's why we created the Galaxy S22 Enterprise Edition Series.

The Galaxy S22 is designed to keep your employees productive wherever they are. It features a best-in-class screen and our fastest Galaxy processor to date. Employees also benefit from all the tools, applications, defence-grade security and support you'd expect from a Samsung device, including an embedded S Pen¹.

Plus, with three camera lenses and AI technology, it's easy to create incredible content to promote your business and excite new audiences.

It's time to change the rules of a business phone. Reach new levels with the Galaxy S22 Enterprise Edition Series.

Epic in every way

Make every job epic. The Galaxy S22 Ultra has an unrivalled display matched with the ultimate HDR performance for an uninterrupted workspace. Its 6.8" Dynamic AMOLED 2X display, QHD+ resolution and adaptive 120Hz refresh rate ensures you're experiencing the clearest and sharpest picture to show your ideas off at their best. Built for productivity on the go, the Galaxy S22 has a strong Armour Aluminium body and Gorilla Glass Victus+ on both front and back, resulting in the toughest Galaxy ever produced. Plus, with IP68 rating, you can rest easy knowing your device will be up to the challenge, whatever the conditions.

Performance & Productivity

Easily keep up with today's fast-paced world of business. With the Galaxy S22 Series, the only thing holding you back is how fast you can think. The devices come with a 4nm processor Exynos 2200, making it our fastest Galaxy ever. And, for the first time, the Galaxy S22 Ultra features an embedded S-Pen¹ to capture inspiration on the move. The writing-to-text feature in your office apps intelligently grabs image files to translate to text and syncs notes across devices instantly, so you can gather your thoughts whenever. The S Pen also has ultra-low latency—combined with the 120Hz display—giving you the same perfect precision and responsiveness as you'd expect from a real pen while maintaining the most efficient power consumption.

Work from your phone whenever, wherever with Enterprise Edition

Getting multiple devices logged onto your enterprise mobility management (EMM) platform is simple with Knox Mobile Enrolment—part of Knox Suite. The all-in-one offering of additional Knox licenses comes as part of Enterprise Edition to secure, deploy and manage your mobile fleet. You get everything you need to make your IT team's life simple and your employees as productive as they can be. You can keep your devices protected from mobile threats with up to 5 Year Security and Maintenance Releases. And with Extended Product Lifecycle², you can ensure consistency across your fleet of devices. Enterprise Edition also features a QuickStart build service for those that want to take advantage of the Knox Suite features.

¹ S Pen only on the Galaxy S22 Ultra device. ² Devices will remain on sale for a defined period of time after first global market release. The defined period will differ according to each specific device. Subject to change without notice.
